- **Sandy Hong** Southwest DNC
- **Linda Spina** East Central DNC
- **West Central** – Vacant
- **Northern**- Vacant

MO TITLE V STATE NEEDS ASSESSMENT FFY 2021 - 2025

- On April 4, 2020, stakeholders both internal and external to DHSS convened for a virtual presentation and kickoff discussion
- Qualitative information was gathered from focus groups and through survey data, including both ongoing population-based surveys and surveys developed specifically for needs assessment purposes
- Quantitative data was analyzed by the MCH Epidemiology team on a range of perinatal, infant, child (including CSHCN) and maternal health indicators drawn from a broad variety of state and national data sources
 - Nearly 100 indicators were reviewed and analyzed for the needs assessment process.
 - When numbers permitted, each indicator was broken down among multiple axes, including race, ethnicity, geography, and poverty
 - Trend analysis was performed on current national and state performance and outcome measures as well as indicators of population/community health status and health system capacity

TITLE V MCH BLOCK GRANT FFY 2021 – 2025 PRIORITIES

National Priority Areas

- Improve pre-conception, prenatal and postpartum health care services for women of childbearing age
- Promote safe sleep practices among newborns to reduce sleep-related infant deaths
- Reduce intentional and unintentional injuries among children and adolescents
- Reduce obesity among children and adolescents
- Ensure coordinated, comprehensive and ongoing health care services for children with and without special health care needs

State Priority Areas

- Enhance access to oral health care services for children
- Promote protective factors for youth and families
- Address social determinants of health inequities

Overarching Principles

- Ensure access to care, including adequate insurance coverage, for MCH population
- Promote partnerships with individuals, families, and family-led organizations to ensure family engagement in decision-making, program planning, service delivery, and quality improvement activities

MISSOURI State Action Plan

Women/Maternal Health – Entry 1

Women/Maternal Health

State Action Plan Table (Missouri) - Women/Maternal Health - Entry 1

Priority Need

Improve pre-conception, prenatal and postpartum health care services for women of childbearing age.

NPM

NPM 1 - Percent of women, ages 18 through 44, with a preventive medical visit in the past year

Objectives

By 2025, DHSS will develop/promote strategies to increase the percent of women who had an annual preventive medical visit from 72.9% (BRFSS 2018).
By 2025, DHSS will promote strategies to reduce the incidence rate of severe maternal morbidity from 74.0 per 10,000 delivery hospitalizations (SMM rate based on without blood transfusion, PAS 2018).

Strategies

Implement community-based health promotion efforts.
Communicate the value of and collaborate with partners in maternal health initiatives.
Raise awareness of the importance of reproductive life planning.
Educate women on the importance of immunizations.
Promote comprehensive health care for pregnant women and women of childbearing age.
Support activities and facilitate partnerships to create environments that support healthy eating and active living.
Partner with tobacco control programs and community-based partners to assure delivery of effective tobacco cessation services.
Participate in maternal and women's health partnerships by convening public health and advocacy partners for strategic thinking and action, engaging clinicians as partners, and engaging collaboratives to improve maternal health and health care equity.
Address underlying social determinants of health.
Build program and policy evaluation capacity.

EGMs

Status

EGM 1.1 - Percent of women who reported a routine checkup within past 2 years (BRFSS).

Active

Priority Need

Improve pre-conception, prenatal and postpartum health care services for women of childbearing age.

NPM 1

Percent of women, ages 18 through 44, with a preventive medical visit in the past year

Objectives

By 2025, DHSS will develop/promote strategies to increase the percent of women who had an annual preventive medical visit from 72.9% (BRFSS 2018).

By 2025, DHSS will promote strategies to reduce the incidence rate of severe maternal morbidity from 74.0 per 10,000 delivery hospitalizations (SMM rate based on without blood transfusion, PAS 2018).

ESM

Percent of women who reported a routine checkup within past 2 years (BRFSS).

Women/Maternal Health – Entry 1 (Continued)

NOMs

NOM 2 - Rate of severe maternal morbidity per 10,000 delivery hospitalizations

NOM 3 - Maternal mortality rate per 100,000 live births

NOM 4 - Percent of low birth weight deliveries (<2,500 grams)

NOM 5 - Percent of preterm births (<37 weeks)

NOM 6 - Percent of early term births (37, 38 weeks)

NOM 8 - Perinatal mortality rate per 1,000 live births plus fetal deaths

NOM 9.1 - Infant mortality rate per 1,000 live births

NOM 9.2 - Neonatal mortality rate per 1,000 live births

NOM 9.3 - Post neonatal mortality rate per 1,000 live births

NOM 9.4 - Preterm-related mortality rate per 100,000 live births

NOM 10 - The percent of infants born with fetal alcohol exposure in the last 3 months of pregnancy

NOM 11 - The rate of infants born with neonatal abstinence syndrome per 1,000 hospital births

NOM 23 - Teen birth rate, ages 15 through 19, per 1,000 females

NOM 24 - Percent of women who experience postpartum depressive symptoms following a recent live birth

A solid green rectangular graphic is positioned at the top center of the dark green title box.

PLANNING AND DEVELOPING FFY2022-2026 WORK PLANS

What do YOU
see?

Why
perspective is
IMPORTANT!

COMPLETING FOCUSED LOCAL ASSESSMENT

- Complete a focused local assessment of the health status, strengths, weaknesses, and needs of the MCH population in their community, based on the population domains of women/maternal, perinatal/infant, child, and adolescent, and existing health inequities and weaknesses/gaps in access to care
- Utilize the Missouri Public Health Information Management System (MOPHIMS) Missouri Information for Community Assessment (MICA) Data Profiles (specifically the Community Maternal, Infant, and Child Health Profile), local data, surveillance data and other data sources to assist in the assessment process, priority health issue and outcome measure selection, and systematic program planning
- Seek input from MCH stakeholders including families/consumers, providers, and other community partners about the issues related to local MCH program services and delivery
- Based on the findings from the focused local assessment, select at least one priority health issue (PHI) derived from the Missouri Title V MCH Block Grant FFY 2021-2025 MCH Priorities and develop a five-year (FFY 2022-2026) work plan to address the selected PHI

The Missouri Public Health Information Management System (MOPHIMS) provides a common means for users to access public health related data to assist in defining the health status and needs of Missourians.

MISSOURI INFORMATION
FOR COMMUNITY ASSESSMENT

DATA PROFILES

Community Data Profiles are available on various subject areas and provide data on 15-30 indicators for each geography selected.

- Maternal, Infant and Child Health Profiles
- Chronic Disease Profiles
- Injury Profiles
- Death Profile
- Hospital and Emergency Room Visit Profiles
- Special Demographic Profiles

MISSOURI INFORMATION
FOR COMMUNITY ASSESSMENT

DATA MICAS

The Missouri Information for Community Assessment (MICA) allows users to summarize data, calculate rates, and prepare information in a graphic format.

- Maternal, Infant and Child Health MICAs
- Chronic Disease MICAs
- Injury MICA
- Death MICA
- Hospital and Emergency Room Visit MICAs

Environmental Public Health
Tracking Program

EPHT

The Missouri Environment Public Health Tracking (EPHT) program was developed to assist the public, communities, policymakers, and scientists, answer fundamental questions about the relationships between environmental exposures and health effects. Data on this site also include hazard and disease surveillance.

- Health Data
 - Blood Lead Levels

Community Data Profiles

Community Data Profiles are available on various subject areas such as cause of death, chronic diseases, unintentional injuries, prenatal and others. Each Community Data Profile tab provides data on 15-30 indicators for each geography selected. Information provided includes the number of events, rate for the selected geography, statistical significance compared to the state, quintile ranking (for counties) and the state rate.

Maternal, Infant and Child Health Profiles

- Child Health
- Delivery
- Infant Health
- Prenatal

Injury Profiles

- Assault Injury
- Self-Inflicted Injury
- Unintentional Injury

Hospital and Emergency Room Visit Profiles

- Emergency Room
- Hospital Revenue
- Inpatient Hospitalization

Chronic Disease Profiles

- Chronic Disease Comparisons
- Alcohol and Substance Use Disorder
- Diabetes
- Heart Disease
- Stroke

Death Profile

- Leading Causes of Death

Special Demographic Profiles

- Minority Health
- Women's Health
- Women's Reproductive Health
- Social and Economic Indicators

INTRODUCTION

Welcome to the Missouri KIDS COUNT data tool. This site provides interactive access to the data reported in the *Missouri KIDS COUNT Data Book*. First produced in 1993, the *Missouri KIDS COUNT Data Book* is an invaluable repository of comprehensive, longitudinal information on the status of children and their families.

The mission of the *Missouri KIDS COUNT Data Book* is to improve the well-being of Missouri's children and families. The data book and website are easily accessible tools to assist local and state public policymakers and child advocates in identifying both needs and solutions for Missouri's children and their families.

The *Missouri KIDS COUNT Data Book* is a collaborative project of the [Family and Community Trust](#) (FACT), the [Center for Health Policy](#) (CHP) at the University of Missouri, and more than 20 public and private organizations across the state. CTF and the [Annie E. Casey Foundation](#) provide the primary funding for the data book and data tool.

In addition to the interactive data browser, this site also offers [archived PDF versions of the data book and county pages](#) from 2006 through 2018.

For more information, please visit the [Missouri KIDS COUNT main site](#).

FFY2022 Budget Worksheet

- Develop a proposed FFY 2022 contract budget using contract funds to accomplish the proposed work plan- this is due **July 31, 2021**

Google Images

PREPARING FFY 2022-2026 MCH WORK PLAN

- Develop a proposed FFY 2022-2026 Work Plan- the first draft is due to your DNC via email on or before **April 1, 2021, finalized proposed work plan due on or before June 1, 2021.**

Develop FFY 2022-2026 MCH Work Plan:

- Identification of selected PHI and targeted national, state, and/or local outcome measures
- Statement of the problem
- Goals for addressing the stated problem
- Evidence-based strategies to address the problem
- System outcomes & activities for each of the six levels of the Spectrum of Prevention for each contract year
- Identification of risk and protective factors that influence health disparities within families and community through the Life Course Perspective
- Strategies to address the identified health inequities
- Strategies to address existing weaknesses/gaps in access to care

LIFE COURSE PERSPECTIVE

- A multidisciplinary approach to understanding the mental, physical and social health of individuals, which incorporates both life span and life stage concepts that identify critical stages that can influence a an individual's lifelong health and wellbeing
- Emphasizes the importance of cumulative and long-term impacts both within an individual's life and across generations that determine an individual's health trajectory
- Recognizes both protective and risk factors that contribute to health outcomes across the span of a person's life

IDENTIFICATION OF RISK & PROTECTIVE FACTORS

Protective Factors

- Nurturing family
- Safe neighborhoods/communities
- Economic security
- Strong & positive relationships
- Access to quality health care services
- Access to high quality schools & early child care
- Education
- Prenatal/parenting classes
- Accessible venues for physical activity
- Access to healthy food choices
- Smoke-free environments/clean indoor air quality
- Opportunities for families to share healthy experiences

Risk Factors

- Food insecurity
- Homelessness
- Domestic violence
- Poverty
- Discrimination
- Low birth weight
- Lack of access to health services
- Youth access to tobacco
- Peer acceptance of unsafe behavior
- Weak physical education policies
- Visibility of unhealthy food choices
- Interpersonal violence

STRATEGIES TO ADDRESS HEALTH INEQUITIES

STRATEGIES TO ADDRESS GAPS IN ACCESS TO CARE

- Progressive approaches to care delivery
 - Centering pregnancy
 - Telehealth & electronic communication
 - Mobile health units
- Transportation measures
 - Multidisciplinary clinics
 - Grouping appointments
 - Multiple family members or multiple providers
- Thorough health care documentation, shared health records, and improved communication between providers and with patient/family
- “Warm” hand-off
- School-based health clinics

PREPARING FFY 2022-2026 MCH WORK PLAN

Maternal Child Health Services Contract Work Plan

FFY 2022-2026

Contract Period October 1, 2022-September 30, 2026

LPHA Contractor:

Selected Priority Health Issue: (include targeted national, state, and/or local outcome measure(s) for each PHI selected)

Statement of the Problem: (include statistical data to illustrate the scope of the priority health issue in the community, potential root causes and/or other community elements that may contribute to the problem, a discussion of social determinants of health and health inequities in the community, a discussion of existing strengths/weaknesses/gaps in access to care, the unique characteristics of the populations (i.e. income/employment status, geographic location, gender, age, education attainment, and race/ethnicity, etc.), and anecdotal or descriptive elements that give a sense of the story behind the data)

Goal(s): (for addressing the stated problem based on the targeted national, state, and/or local outcome measure(s))

Evidence-Based Strategies: (include evidence-based strategies that will be used to address the problem, the identified health inequities, and the existing weaknesses/gaps in access to care)

TITLE V MCH BLOCK GRANT FFY 2021 – 2025 PRIORITIES

National Priority Areas

- Improve pre-conception, prenatal and postpartum health care services for women of childbearing age
- Promote safe sleep practices among newborns to reduce sleep-related infant deaths
- Reduce intentional and unintentional injuries among children and adolescents
- Reduce obesity among children and adolescents
- Ensure coordinated, comprehensive and ongoing health care services for children with and without special health care needs

State Priority Areas

- Enhance access to oral health care services for children
- Promote protective factors for youth and families
- Address social determinants of health inequities

Overarching Principles

- Ensure access to care, including adequate insurance coverage, for MCH population
- Promote partnerships with individuals, families, and family-led organizations to ensure family engagement in decision-making, program planning, service delivery, and quality improvement activities

Statement of the Problem

- Statistical data to support PHI focus
- Root causes and/or community contributing factors
- Discuss Social Determinants of Health in community
- Discuss Health Inequities in community
- Strengths/weaknesses/gaps in access to care
- Unique characteristics of the population
- Descriptive elements to tell the story behind the data

GOAL(S)

- Based on National/State/Local Outcome Measures
- Provides direction
- Clear focus on what is important
- Helps provide clarity in decision making
- Gives control
- Provides motivation
- Gives satisfaction and purpose

Evidence Based Strategies

- Show the “how” you will meet your goal
- Less specific than an action plan
- Give overall direction
- Make a difference to reach your goal
- Shown effective by research
- Address identified health inequities
- Address existing weakness/gaps in access to care

Intervention MICA

BUILDING HEALTHY COMMUNITIES

Intervention MICA is a web-based resource for planning, implementing and evaluating interventions to improve the health of a community. You may access information, tools and resources for health conditions and risk factors.

Intervention MICA encourages the use of multiple strategies and settings to increase the likelihood of creating lasting behavior change within a population.

Intervention planning is organized around six evidence-based strategies: campaigns and promotions, provider education, group education, individual education, supportive relationships, and environment and policy.

The following health issues are currently available on Intervention MICA:

[Asthma](#)
[Colorectal Cancer](#)
[Diabetes](#)
[Heart Disease and Stroke](#)
[Immunizations](#)
[Injuries from Falls](#)

[Motor Vehicle Injuries](#)
[Nutrition](#)
[Oral Health](#)
[Physical Activity](#)
[Tobacco Use](#)

For more about Intervention MICA, continue to [What is Intervention MICA?](#)

Or select another section:

- [What is an intervention?](#)
- [What is evidence?](#)
- [How to use Intervention MICA](#)
- [Intervention Topics Overview](#)

Physical Activity Intervention Strategies

Select a strategy

The physical activity intervention strategies are described separately below. Each of these strategies is most effective when it is combined with other strategies. For example, changing knowledge, attitudes, and beliefs will do little to increase physical activity if there are no places to go to be physically active. Similarly, changing knowledge, attitudes, and beliefs will not be as effective if there is not social support for engaging in physical activity.

As described in [Readiness and Preparation](#), it is important to make sure that the intervention strategies are created to represent and address the needs of the [Population](#). This may include paying attention to how different groups think about physical activity (e.g., preferences for different types of physical activity may exist for men and women or children and adults). Furthermore, an intervention works best when there is an attempt to address language, reading level, and cultural barriers (see [Cultural Competence](#) for more information).

Select one of the following intervention strategies	The purpose of your intervention is to change...			
	i Behavior	i Knowledge, attitudes, skills, and beliefs	i Social support	i Environments and policies
i Campaigns & Promotions	C	E	E	C
i Individual Education	E	E	I	I
i Group Education	E	E	E	I
i Supportive Relationships	E	E	E	I
i Provider Education	E	E	E	I
i Environment & Policies	E	I	I	E

E = evidence supports the effectiveness of this strategy

C = evidence supports use of this strategy in combination with other strategies

I = insufficient evidence to make a recommendation

Tools & Resources for Campaigns & Promotions

Physical Activity: Campaigns & Promotions

Children and Adolescents

The President's Challenge

<http://www.presidentschallenge.org/>

The President's Challenge is a national youth fitness program that encourages active lifestyles. Information is available for kids, adults, and seniors.

Centers for Disease Control and Prevention 'VERB Youth Media Campaign'

<http://www.cdc.gov/youthcampaign/index.htm>

VERB is a national campaign to encourage children to participate in physical activity regularly. VERB materials are available for viewing and download on the site.

CANFit

<http://www.canfit.org/>

The California Adolescent Nutrition and Fitness (CANFit) Program is a nutrition and physical activity promotion program for low-income African American, American Indian, Latino, Asian American, and Pacific Islander youth.

GoGirlGo!

<http://www.womenssportsfoundation.org/en/home/programs/gogirlgo>

Go Girl World is an interactive site for girls who participate in sports to communicate with each other and advocate for women in sports. Features include a message board, an action center, an advice column, and more.

Project ACES

<http://www.lensaunders.com/aces/aces.html>

Project ACES (All Children Exercise Simultaneously) aims to educate children about the importance of lifelong fitness. Each May, millions of school children all over the globe exercise simultaneously in a symbolic gesture of fitness and unity.

Best Practice and Evidence-Based Resources

MCH Information and Data

- **MCH Library** – provides accurate, timely information including the weekly newsletter MCH Alert, resource guides, full text publications, databases, and links to essential MCH resources.

Other Public Health Organizations with Best Practice/Evidence-Based Databases

- **Agency for Healthcare Research and Quality EBP Report Database** – the Evidence-Based Practice Centers (EPC) Program awards five-year contracts to institutions to serve as EPCs. Awardees review, assess, and report on clinical, behavioral, and organizational and financing topics within scientific literature.
- **Association of State and Territorial Dental Directors (ASTDD) Best Practices Project** – provides an online resource for best practice approaches in order to assist state and community oral health programs build promising practices in the context of their environment.
- **National Association of County and City Health Officials (NACCHO) Model Practice Database** – provides access to models and reviews of promising practices, with the ability to search by year, category, type and state.
- **Office of Adolescent Health (OAH)** – the OAH database provides HHS program models for best practices in teen pregnancy prevention and allows targeted searches by population, age, and more.
- **SAMHSA's National Registry of Evidence-based Programs and Practices** – an online registry of nearly 300 public health interventions committed to evidence-based practices. Participation and enrollment connects members to programs that best fit their communities and provides guidance in implementation.

Evidence-Based Public Health Resources

- **Association of State and Territorial Health Officials (ASTHO) Evidence-Based Public Health Resource Center** – is committed to sharing evidence-based practice in public health for more successful programs and policies, greater productivity and better outcomes.
- **The Campbell Collaboration** – this research network aids institutions and professionals in education, crime and justice, social welfare and international development through preparation and dissemination of systematic reviews.
- **Child Trends Lifecourse Interventions to Nurture Kids Successfully (LINKS) Synthesis** – an online resource based on experimentally evaluated programs under the topics of program population, program outcome and program approach.
- **Coalition for Evidence-Based Policy** – a nonprofit organization that closely reviews all program evaluations within all areas of social policy in order to assist officials in determining those that are most promising.

		FFY 2023: []

Spectrum of Prevention

Level of Spectrum	Definition
Influencing policy and legislation	Develop strategies to change laws and policies to influence outcomes
Changing organizational practices	Adopt regulations and shape norms to improve health and safety
Fostering coalitions and networks	Bring together groups and individuals for broader goals & greater impact
Educating providers	Inform providers who will transmit skills and knowledge to others
Promoting community education	Reach groups of people with information and resources to promote health & safety
Strengthening individual knowledge and skills	Enhance an individual's capability to prevent injury/illness & promote safety

System Outcome

- Reflect changes in the community system
- Include evidence of accomplishment
- At least one for each PHI in each level of the Spectrum
- Outcomes are NOT the volume of work accomplished
- SMART
 - S - Specific, Significant, Stretching
 - M - Measurable, Meaningful, Motivational
 - A - Agreed upon, Attainable, Achievable, Acceptable, Action-oriented
 - R - Realistic, Relevant, Reasonable, Rewarding, Results-oriented
 - T - Time-based, Time-bound, Timely, Tangible, Trackable

Activities

- Each level of the Spectrum
- Each year
- Leads to each System Outcome(s)
- Show progressive growth toward Outcome(s)
- Keep in mind your target audience
- Ask yourself “what do I need to DO to reach my outcome?”
- Think outside the box

A solid green rectangular graphic is positioned at the top center of the dark green box, just above the word "EVALUATION".

EVALUATION

COMPONENT

Evaluation

- Evaluation can help identify weaknesses in implementation
- Provides documentation of progress toward goals/effectiveness/desired outcomes
- Justification for continued funding
- Ensure effectiveness/efficient use of resources
- Increased demand for accountability from funders and to stakeholders
- *It is one of the Ten Essential Public Health Services!*
